Are you a scholar working within a Canadian Faculty of Medicine ?

Study Title:

Identifying and addressing intersecting barriers of gender, sex, and race to academic productivity in Canadian Faculties of Medicine during the COVID-19 pandemic.

What is this study about?

We know that the COVID-19 pandemic may have impacted the academic productivity of women in academic medicine, but there may be additional barriers for scholars who are also members of other groups underrepresented in medicine (for example, racialized, gender minority, sexual minority or disability groups). To explore this further we are:

Recruiting scholars to take part in a virtual one to one interview lasting 60-90 minutes, where we will explore the impact the COVID-19 pandemic has had on academic productivity.

Findings from these interviews will inform recommendations on how academic centers can tackle barriers to academic activity. This project is in partnership with the Canadian Medical Association and funded by the Social Sciences and Humanities Research Council.

Interested in taking part?

To express your interest or for further information please email Georgia Black, Research Analyst at georgia.black@camh.ca .

Eligibility

You are:

- a qualified scholar associated with a Canadian Faculty of Medicine (this can include individuals who are in pursuit of a doctoral/post-doctoral qualification)
- resident within Canada
- fluent in verbal and written English
- 18 years old or above
