REFERRING TO THE SEXUAL BEHAVIOURS CLINIC – Medical

The Sexual Behaviours Clinic of the Centre for Addiction and Mental Health provides multidisciplinary assessment and treatment services for individuals with sexual behaviours or urges that have resulted in personal or legal difficulties. The initial assessment consists of an interview and may include phallometric assessment or psychological testing. Decisions related to treatment options will be made by the assessment and treatment team. Treatment options can include therapy, referrals to other clinics/programs at CAMH, and a sex-drive reducing medication consultation with a psychiatrist.

Individuals will be assessed only at the conclusion of outstanding legal issues related to sexual offences. We do not accept referrals for individuals with pending charges for sexual offences.

Medical Doctors are asked to submit the CAMH Referral Form with as much detail as possible about the nature of the concerns. Please also provide any psychiatric or psychological reports that may be relevant to understanding the individuals' mental health and/or sexual concerns.

Send referrals to:
