

Did you know?

Cannabis can affect your driving.

Studies have shown
that **smoking or vaping
cannabis can impair
your driving for up to 6
hours**, with some people
reporting impairment
for even longer.

A person is seated in a driving simulator, viewed from behind. The simulator's screen displays a road scene with a car ahead and a rearview mirror. The text is overlaid on this scene.

It is still not
known **how long**
newer forms of
cannabis, such as
high-potency
products, edibles
or drinkables,
affect driving.

**Stay safe and avoid driving
after using cannabis.**
